

Front end development: Arrays

JavaScript – school method

The following exercise contains the following subjects:

- ◆ object
- ◆ arrays
- ◆ array methods

Instructions

Create a method for your school object that you created in the last exercise called “assignStudent” that takes two arguments, a student and a subject.

Assign all of the students to the first available teacher who teaches that subject and who is not in full capacity. If all of the teachers are in full capacity log to the console “Sorry, no available teachers left”

Submit the file to Hive.
