Front end development: Basics

JavaScript – fortune teller

The following exercise contains the following subjects:

◆ functions

Instructions

Why pay a fortune teller when you can just program your fortune yourself?

- Write a function named `tellFortune` that:
  - takes 4 arguments: number of children, partner's name, geographic location, job title.
  - Outputs your fortune to the console like so: "You will be a X in Y, and married to Z with N kids"

Submit the file to Hive.
